CANDIDATE PROFILE // THE MECHANICS OF MEANING

Randy Bryan Moore is a systems-minded social worker, public-service leader, and working musician with 13+ years across nonprofit advocacy, government, community engagement, organizational operations, and public communication.

His work begins with core operational questions: *What is actually happening here? What information matters? Where are people compensating for the system? Which assumptions no longer fit? How do we make the next decision easier?*

Across policy campaigns, constituent databases, statewide coalitions, executive briefing systems, music, and emerging AI workflows, the common thread is translating complexity into structures people can use. The Richmond Symphony opportunity brings those threads together: organizational systems, human relationships, public service, technology, and a lifelong connection to music.

01 • HOW I WORK

Four Operating Principles

01

Listen for the Real System

The documented workflow is only part of the picture. I start by listening to the people doing the work, tracing exceptions, and understanding why the current process developed.

02

Make Complexity Legible

I gather information until the structure becomes visible, then reduce it into the few relationships, signals, and decisions that matter.

03

Design Around People

A system succeeds when the person using it understands what to do, why it matters, and where human judgment belongs.

04

Turn Learning into Infrastructure

Once something works, I document the logic, test it, build feedback into it, and make the successful pattern easier to repeat.

02 • POSITION REQUIREMENTS ALIGNMENT

Track Record vs. Richmond Symphony Priorities

INSTITUTIONAL PRIORITY	DEMONSTRATED TRACK RECORD	RICHMOND SYMPHONY APPLICATION
CRM Administration & Data Integrity	Used EveryAction to organize constituent engagement, segmentation, outreach lists, follow-up workflows, and reporting at Save the Children Action Network. At Active Minds, evaluated organizational needs and helped select Muster to establish a new digital advocacy capability.	Transferable foundation for Bloomerang administration, data governance, reporting, integrations, user support, and dependable fundraising information.
Data Analysis, Reporting & Decision Support	Built tracking, reporting, briefing, and recommendation systems across nonprofit advocacy and government roles. Prepared information for organizational leaders and coordinated complex records, deadlines, stakeholders, and outcomes.	Supports the role Eboni described as a data and visualization thought partner who turns fundraising information into useful recommendations and process improvements.
Operations, Finance Partnership & Process Design	Managed complex nonprofit workflows involving budgets, grants, policy implementation, event operations, documentation, reporting, and cross-functional coordination.	Foundation for gift administration, financial controls, Advancement-Finance reconciliation, SOP development, workflow assessment, and audit-ready documentation.
People Leadership & Coaching	Supervised graduate interns and MSW practicum students, providing structured coaching, feedback, and development. Former youth music instructor mentoring children and young musicians. Led multi-organization coalitions and partner initiatives.	Directly relevant to supervising and developing the Annual Fund Manager and Advancement Assistant while improving the systems supporting their work.
Community, Patron & Artistic Fluency	Served as a public-facing representative and policy spokesperson across Central Virginia, translating major federal priorities for local governments, businesses, nonprofits, advocates, press, and community stakeholders while carrying local context back into Senate decision-making. Richmond-based contract pianist at The Jefferson Hotel since 2022, arranger, and producer.	Connects nonprofit operations experience with firsthand understanding of musicians, audiences, arts participation, hospitality, and Richmond's cultural community.

03 • STRATEGIC ONBOARDING + FIRST-YEAR ROADMAP

Advancement Systems Strategy: Discovery, Alignment & Scale

Full Operational Roadmap in Online Dossier ↗

DAYS 1-30 // LISTEN + MAP

Understand People, Workflows & Decisions

Start with active listening and the operation as it exists.

- Complete Bloomerang New User Orientation & learning pathways while shadowing workflows.
- Conduct structured listening sessions with staff across Advancement and Finance using tools.
- Shadow full gift lifecycle: receipt, entry, batching, Finance validation, and acknowledgment.
- Audit systems configuration, custom fields, naming conventions, and reporting filters.
- Map recurring workflows, ownership handoffs, deadlines, and manual workarounds.
- Establish baseline for data quality, reporting reliability, acknowledgment timing, and workload.

30-DAY KEY OUTPUTS

Current-State Map • Staff Listening Notes • Issues Register • Data Audit • Early Recs

DAYS 31-60 // ALIGN + STANDARDIZE

Build Shared Operating Standards

Turn what I learned into clear, reliable operating rhythm.

- Document shared definitions, ownership, controls, and Finance reconciliation responsibilities.
- Standardize priority SOPs: gift processing, acknowledgments, list generation, and exception handling.
- Identify strategic data points to illuminate donor trends, retention, and community programs.
- Review segmentation and renewal processes with Annual Fund Manager to reduce manual work.
- Establish useful reporting views for Annual Fund, retention, portfolio, and stewardship.
- Create a regular management rhythm with direct reports around priorities, goals, and feedback.

60-DAY KEY OUTPUTS

Priority SOPs • Shared Definitions • Advancement-Finance Map • Dashboard Prototype • Backlog

DAYS 61-90 // IMPROVE + TEST

Test & Deploy Validated Improvements

Begin implementing the strongest validated opportunities.

- Launch 1-2 workflow improvements selected for high staff value and manageable risk.
- Refine dashboards around contributed income, donor retention, and portfolio activity.
- Establish a living Data & Operations Handbook / SOP portal to coordinate process updates.
- Establish a repeatable Advancement-Finance review cadence for ongoing reconciliation.
- Engage Bloomerang Professional Services / support where specialized expertise reduces risk.
- Present a 12-month roadmap separating immediate fixes, training, and strategic projects.

90-DAY KEY OUTPUTS

Validated Improvements • Living Operations Portal • Reporting Framework • 12-Mo Roadmap

MONTH 6 // MEASURE + EXPAND

Independent Bloomerang administration across core Advancement workflows, established Advancement-Finance reconciliation rhythm, with automation where appropriate, robust LYBUNT/SYBUNT renewal tracking, active staff SOP portal.

YEAR 1 // INSTITUTIONALIZE + PLAN FORWARD

Validated analytics, stronger cross-functional data use, and scalable infrastructure based on first-6-months discovery.

OPERATING PRINCIPLE

Listen before redesigning: The first stage is active listening: understand how people experience the system, what already works, where institutional knowledge lives, and where recurring friction appears. Structured feedback sessions with staff and cross-functional partners create the baseline. From there, map the workflows, test assumptions, make changes collaboratively, and build feedback back into the system.

04 • PROFESSIONAL FOUNDATION

Experience Behind the Roadmap

Full Professional History + Résumé ↗

13+ YEARS

Nonprofit, government, systems, public service, and operations experience.

55 GENERAL ASSEMBLY MEETINGS

Coordinated legislative meetings across state advocacy swings and lobby days.

10 ORGANIZATIONS

Federal youth mental health coalition led through shared data, timelines, and follow-up.

40+ COUNTIES

Public, private, nonprofit, and government relationships managed across Central Virginia through constituent outreach and events.

PEOPLE DEVELOPMENT

Supervised graduate interns and MSW practicum students; former youth music instructor.

CRM + SYSTEMS

EveryAction • Salesforce • Muster • Salsa • VAN • Segmentation • Reporting • Data Governance • Process Mapping • SOPs • Automation

WORKING MUSICIAN & PRODUCER

Contract pianist at The Jefferson Hotel since 2022, orchestral arranger, producer, and former music instructor.

05 • EDUCATION & TECHNICAL FOUNDATION

Master of Social Work (MSW)

Univ. of South Carolina • Advanced Standing, Macro Concentration

Bachelor of Social Work (BSW)

Univ. of South Carolina • Leadership Distinction in Civic Engagement • Student Government Senator representing Social Work

Sorensen Political Leaders Institute

Leadership Program Participant • UVA Weldon Cooper Center (2022)

CRM & Data Systems

EveryAction • Salesforce • Muster • Salsa • VAN • Constituent Segmentation • Reporting • Data Governance • Workflow Design

Operations & Process Design

Process Mapping • SOP Development • Cross-Functional Sync • Workflow Automation

Emerging Technology & Tooling

AI-Assisted Research • Prototyping • Data Visualization • Human-in-the-Loop Systems
