POSITIONING • HOW I THINK • SYSTEMS ARCHITECTURE

Nonprofit systems leader with 13+ years across advocacy, government, and operations, and 4 years as a working Richmond pianist.

I operate at the intersection of rigorous structural design (Systemizing Quotient: 86) and high-level conceptual narrative (Verbal IQ: 110). I approach advancement operations as interconnected architectures—bridging technical data integrity with human workflow empathy to build infrastructure fundraising quietly depends on: trustworthy records, resilient high-volume gift lifecycles, and strategic analytics that illuminate the human mission behind the numbers.

01 • CORE COMPETENCIES

Four Transferable Pillars

01

Systemic CRM & Data Integrity

Deep systemizing approach to CRM administration (Bloomerang, EveryAction, Salesforce, VAN, Muster); building clean taxonomies, segmentation models, and dependable gift records.

02

Cross-Functional Finance Partnership

Structural alignment of budgets, grants, and compliance. Prepared to partner with Finance on repeatable reconciliation rhythms, gift controls, and audit-ready schedules.

03

Human-Centered Team Leadership

Factoring the human element into technical workflows: coaching direct reports, supervising MSW practicum students, and designing intuitive SOPs staff embrace.

04

Artistic Literacy & Civic Narrative

Working pianist at The Jefferson Hotel, composer, and former policy spokesperson; translating complex advancement analytics into resonant narratives for donors and community.

02 • POSITION REQUIREMENTS ALIGNMENT

Track Record vs. Richmond Symphony Priorities

INSTITUTIONAL PRIORITY	DEMONSTRATED TRACK RECORD	RICHMOND SYMPHONY APPLICATION
CRM Administration & Data Integrity	Used EveryAction to organize constituent engagement, segmentation, outreach lists, follow-up workflows, and reporting at Save the Children Action Network. At Active Minds, evaluated organizational needs and helped select Muster to establish a new digital advocacy capability.	Transferable foundation for Bloomerang administration, data governance, reporting, integrations, user support, and dependable fundraising information.
Data Analysis, Reporting & Decision Support	Built tracking, reporting, briefing, and recommendation systems across nonprofit advocacy and government roles. Prepared information for organizational leaders and coordinated complex records, deadlines, stakeholders, and outcomes.	Supports the role Eboni described as a data and visualization thought partner who turns fundraising information into useful recommendations and process improvements.
Operations, Finance Partnership & Process Design	Managed complex nonprofit workflows involving budgets, grants, policy implementation, event operations, documentation, reporting, and cross-functional coordination.	Foundation for gift administration, financial controls, Advancement-Finance reconciliation, SOP development, workflow assessment, and audit-ready documentation.
People Leadership & Coaching	Supervised graduate interns and MSW practicum students, providing structured coaching, feedback, and development. Former youth music instructor mentoring children and young musicians. Led multi-organization coalitions and partner initiatives.	Directly relevant to supervising and developing the Annual Fund Manager and Advancement Assistant while improving the systems supporting their work.
Community, Patron & Artistic Fluency	Managed stakeholder relationships across 40+ Central Virginia counties through public, private, and government outreach. Official spokesperson and representative on policy and community issues for U.S. Senator Warner and coalitions. Contract pianist at The Jefferson Hotel since 2022, arranger, and producer.	Connects nonprofit operations experience with firsthand understanding of musicians, audiences, arts participation, hospitality, and Richmond's cultural community.

03 • STRATEGIC ONBOARDING ROADMAP

30-60-90 Day Advancement Systems Plan

Full Operational Roadmap in Online Dossier ↗

DAYS 1-30 // LEARN & MAP

Understand People, Systems & Decisions

Start with the operation as it exists.

- Complete Bloomerang New User Orientation & learning pathways while shadowing workflows.
- Conduct listening sessions and workflow interviews with staff using current tools.
- Shadow full gift lifecycle: receipt, entry, batching, Finance validation, and acknowledgment.
- Audit systems configuration, custom fields, naming conventions, and reporting filters.
- Map recurring workflows, ownership handoffs, deadlines, and manual workarounds.
- Establish baseline for data quality, reporting reliability, acknowledgment timing, and workload.

30-DAY KEY OUTPUTS

Systems Map • Staff Interviews • Issues Register • Data Audit • Early-Win Recs

DAYS 31-60 // ALIGN & STANDARDIZE

Build Trust in the Operating System

Turn what I learned into shared operating standards.

- Document shared definitions, ownership, controls, and Finance reconciliation responsibilities.
- Standardize priority SOPs: gift processing, acknowledgments, list generation, and exception handling.
- Identify strategic data points to illuminate donor trends, retention, and community programs.
- Review segmentation and renewal processes with Annual Fund Manager to reduce manual work.
- Establish useful reporting views for Annual Fund, retention, portfolio, and stewardship.
- Create a regular management rhythm with direct reports around priorities, goals, and feedback.

60-DAY KEY OUTPUTS

Priority SOPs • Shared Definitions • Advancement-Finance Map • Dashboard Prototype • Backlog

DAYS 61-90 // IMPROVE & PLAN

Move from Understanding to Improvement

Begin implementing the strongest validated opportunities.

- Launch 1-2 workflow improvements selected for high staff value and manageable risk.
- Refine dashboards around contributed income, donor retention, and portfolio activity.
- Establish a living Data & Operations Handbook / SOP portal to coordinate process updates.
- Establish a repeatable Advancement-Finance review cadence for ongoing reconciliation.
- Engage Bloomerang Professional Services / support where specialized expertise reduces risk.
- Present a 12-month roadmap separating immediate fixes, training, and strategic projects.

90-DAY KEY OUTPUTS

Validated Improvements • Living Operations Portal • Reporting Framework • 12-Mo Roadmap

6-MONTH HORIZON // OPERATIONAL MASTERY

Full Bloomerang operational mastery, automated reconciliation rhythm, robust LYBUNT/SYBUNT renewal tracking, active staff SOP portal.

1-YEAR HORIZON // STRATEGIC SCALE

Predictive retention analytics, integrated community/education advancement data, scalable infrastructure ready for campaign growth.

OPERATING PRINCIPLE

Learn before redesigning: The first 90 days create trust in the data, workflows, and working relationships through active listening sessions, staff feedback loops, and grounded systems audits. The goal is not to arrive with a replacement system, but to understand what already works, address friction, and improve the operation collaboratively with the people using it every day.

04 • PROFESSIONAL FOUNDATION

Experience Behind the Roadmap

Full Professional History + Résumé ↗

13+ YEARS

Nonprofit, government, systems, public service, and operations experience.

55+ MEETINGS & LOBBY DAYS

General Assembly meetings and statewide lobby days coordinated across advocates and partners.

10 ORGANIZATIONS

Federal youth mental health coalition led through shared data, timelines, and follow-up.

40+ COUNTIES

Central Virginia stakeholder relationships managed through public, private, and government outreach.

PEOPLE DEVELOPMENT

Supervised graduate interns and MSW practicum students; former youth music instructor.

CRM + SYSTEMS

EveryAction, Salesforce, VAN, Salsa, Muster, reporting systems, segmentation, and SOPs.

WORKING MUSICIAN & PRODUCER

Contract pianist at The Jefferson Hotel since 2022, orchestral arranger, producer, and former music instructor.

05 • EDUCATION & TECHNICAL FOUNDATION

Master of Social Work (MSW)

Univ. of South Carolina • Advanced Standing, Macro Concentration

Bachelor of Social Work (BSW)

Univ. of South Carolina • Leadership Distinction in Civic Engagement • Student Gov. Senator (Social Work) • Phi Alpha Honor Society

Sorensen Political Leaders Institute

Leadership Program Participant • UVA Weldon Cooper Center (2022)

CRM & Data Governance

EveryAction • Salesforce • VAN • Salsa • Muster • Segmentation • Reporting • Data Integrity

Operations & Process Design

Process Mapping • SOP Development • Cross-Functional Sync • Workflow Design

Emerging Technology & Tooling

AI-Assisted Research • Prototyping • Data Visualization • Workflow Automation
