POSITIONING • HOW I THINK

Nonprofit systems and operations leader with 10+ years across advocacy, government, and housing, and 4 years as a working Richmond pianist.

I build the infrastructure fundraising quietly depends on: records teams trust, workflows that hold up in high-volume cycles, and reporting that answers the actual strategic question rather than the easiest query. This position joins the two halves of my working life.

01 • CORE COMPETENCIES

Four Transferable Pillars

01

CRM & Data Integrity

EveryAction constituent tagging, outreach workflows, and Muster advocacy evaluation. Prepared to lead Bloomerang administration, data hygiene, and dependable reporting.

02

Operations & Finance Partnership

Managed complex workflows involving budgets, grants, and compliance. Prepared to partner with Finance on reconciliation rhythms, gift controls, and audit-ready schedules.

03

People Leadership & Coaching

Supervised graduate interns and MSW practicum students; led partner coalitions. Ready to coach and develop the Annual Fund Manager and Advancement Assistant.

04

Artistic Literacy & Community

Contract pianist at The Jefferson Hotel since 2022, orchestral arranger, and music producer. Bringing firsthand musical fluency and cultural community connections.

02 • POSITION REQUIREMENTS ALIGNMENT

Track Record vs. Richmond Symphony Priorities

INSTITUTIONAL PRIORITY	DEMONSTRATED TRACK RECORD	RICHMOND SYMPHONY APPLICATION
CRM Administration & Data Integrity	Used EveryAction to organize constituent engagement, segmentation, outreach lists, follow-up workflows, and reporting at Save the Children Action Network. At Active Minds, evaluated organizational needs and helped select Muster to establish a new digital advocacy capability.	Transferable foundation for Bloomerang administration, data governance, reporting, integrations, user support, and dependable fundraising information.
Data Analysis, Reporting & Decision Support	Built tracking, reporting, briefing, and recommendation systems across nonprofit advocacy and government roles. Prepared information for organizational leaders and coordinated complex records, deadlines, stakeholders, and outcomes.	Supports the role Eboni described as a data and visualization thought partner who turns fundraising information into useful recommendations and process improvements.
Operations, Finance Partnership & Process Design	Managed complex nonprofit workflows involving budgets, grants, policy implementation, event operations, documentation, reporting, and cross-functional coordination.	Foundation for gift administration, financial controls, Advancement-Finance reconciliation, SOP development, workflow assessment, and audit-ready documentation.
People Leadership & Coaching	Supervised graduate interns and MSW practicum students, providing expectations, feedback, coaching, professional development, and accountability. Led multi-organization coalitions and partner initiatives.	Directly relevant to supervising and developing the Annual Fund Manager and Advancement Assistant while improving the systems supporting their work.
Community, Patron & Artistic Fluency	Managed stakeholder relationships and public engagement across 40+ Central Virginia counties. Richmond-based contract pianist at The Jefferson Hotel since 2022, songwriter, producer, multi-instrumentalist, orchestral arranger, and former music instructor.	Connects nonprofit operations experience with firsthand understanding of musicians, audiences, arts participation, hospitality, and Richmond's cultural community.

03 • STRATEGIC ONBOARDING ROADMAP

Full Operational Roadmap in Online Dossier ↗

30-60-90 Day Advancement Systems Plan

DAYS 1-30 // LEARN & MAP

Understand People, Systems & Decisions

Start with the operation as it exists.

- Meet individually with the CDO, direct reports, Advancement team, and Finance partners.
- Learn Bloomerang through real workflows, reports, permissions, and recurring staff needs.
- Shadow the full gift lifecycle: receipt, entry, Finance validation, and acknowledgment.
- Map recurring workflows, ownership, handoffs, exceptions, and manual workarounds.
- Establish baseline for data quality, reporting reliability, and staff workload.
- Learn decision-making data needs of CDO and leadership to identify reporting friction.

30-DAY KEY OUTPUTS

Current-State Systems Map • Stakeholder Interviews • Issues Register • Early-Win Recommendations

DAYS 31-60 // ALIGN & STANDARDIZE

Build Trust in the Operating System

Turn what I learned into shared operating standards.

- Document shared definitions, ownership, controls, and Finance reconciliation responsibilities.
- Standardize gift processing, acknowledgments, list generation, and exception handling SOPs.
- Document practical SOPs where consistency or institutional knowledge presents risk.
- Establish useful reporting views for Annual Fund, retention, portfolio, and stewardship.
- Review segmentation and renewal processes with Annual Fund Manager to reduce manual work.
- Create a regular management rhythm with direct reports around priorities and workload.

60-DAY KEY OUTPUTS

Priority SOPs • Shared Data Definitions • Advancement-Finance Map • Dashboard Prototype • Backlog

DAYS 61-90 // IMPROVE & PLAN

Move from Understanding to Improvement

Begin implementing the strongest validated opportunities.

- Launch 1-2 workflow improvements selected for high staff value and low risk.
- Refine dashboards around contributed income, donor retention, and portfolio activity.
- Strengthen visibility into overdue actions, incomplete records, and work needing review.
- Establish a repeatable Advancement-Finance review cadence for reconciliation.
- Identify automation opportunities while preserving human review and financial controls.
- Present a 12-month roadmap separating immediate fixes, training, and strategic projects.

90-DAY KEY OUTPUTS

Validated Improvements • Reporting Framework • Data Governance Priorities • 12-Mo Roadmap

OPERATING PRINCIPLE **Learn before redesigning:** The first 90 days create trust in the data, workflows, and working relationships. The goal is not to arrive with a replacement system, but to understand what already works, address friction, and improve the operation collaboratively with the people using it every day.

04 • PROFESSIONAL FOUNDATION

Full Professional History + Résumé ↗

Experience Behind the Roadmap

10+ YEARS

Nonprofit, government, systems, public service, and operations experience.

55 LEGISLATIVE MEETINGS

General Assembly meetings coordinated across advocates, lawmakers, and partners.

10 ORGANIZATIONS

Federal youth mental health coalition led through shared data, timelines, and follow-up.

40+ COUNTIES

Central Virginia stakeholder relationships managed through public-sector outreach.

PEOPLE DEVELOPMENT

Supervised graduate interns and MSW practicum students with structured coaching.

CRM + SYSTEMS

EveryAction, Muster, reporting systems, segmentation, SOPs, and tech adoption.

WORKING MUSICIAN & PRODUCER

Contract pianist at The Jefferson Hotel since 2022, orchestral arranger, producer, and former music instructor.

05 • EDUCATION & TECHNICAL FOUNDATION

Master of Social Work (MSW)

Univ. of South Carolina • Advanced Standing, Macro Concentration

Bachelor of Social Work (BSW)

Univ. of South Carolina • Leadership Distinction in Civic Engagement

Sorensen Political Leaders Institute

Leadership Program Participant • UVA Weldon Cooper Center (2022)

CRM & Data Governance

EveryAction • Muster • Constituent Segmentation • Reporting • Data Integrity

Operations & Process Design

Process Mapping • SOP Development • Cross-Functional Sync • Workflow Design

Emerging Technology & Tooling

AI-Assisted Research • Prototyping • Data Visualization • Workflow Automation
